				Median	
				4.00	

4 - In general, the course was

Response Option	Weight	Frequency	Percent	Percent Responses	Means
Too easy for me	(1)	0	0.00%		4.00
Easy but engaging	(2)	1	6.67%		
A good level for me	(3)	1	6.67%		
Challenging but manageable	(4)	10	66.67%		
Too difficult for me	(5)	3	20.00%		
				0 25 50 100	Question
Response Rate				Mean	STD
15/40 (37.50%)				4.00	0.76
				Median	
				4.00	

Duke University - Duke Kunshan University

SP22S3 DKU UG End of Session Course Evaluations

Course: 7W1-MATH-201-002: Multivariable Calculus
Instructor: Lin Jiu *
Response Rate: 15/40 (37.50 %)

5 - The pace of the course was

Response Option	Weight	Frequency	Percent	Percent Responses	Means			
Too slow for me	(1)	0	0.00%					
Slow but engaging	(2)	0	0.00%					
Just right for me	(3)	3	20.00%					
Fast but manageable	(4)	9	60.00%					
Too fast for me	(5)	3	20.00%					
				0 25 50 100	Question			
Response Rate				Mean		STD		Median
15/40 (37.50%)				4.00		0.65		4.00

6 - Which assignment or activity would you most recommend the instructor to use again when teaching the course in the future and why?

Response Rate	6/40 (15%)
<ul style="list-style-type: none"> • Want more practice questions <input type="checkbox"/> no credit <input type="checkbox"/> rather than massive time consuming homework • webwork Problem set: because it is easy to check answers by students themselves and check mistakes • Homework and quiz (help us review the course materials each week) • Prof Lin Jiu is very organized. He is also a very easygoing person. I like being in his classes and will always prefer him for my MATH courses. • webwork • The quiz really helps 	

7 -

Response Rate	5/40 (12.5%)
<ul style="list-style-type: none"> • prefer hand written homework rather than WeBWork because the input is more than inconvenient. sometimes it waste way more time than solving the question itself • quiz: it would be better if better aligned with the current pace of the class, i.e. week 6 will test on understanding about week 3 Mon.-Wed. material instead of materials from last week. • The proportion of final exam should be reduced • Not much. I would like point out that for MATH 105, he gave us like 100 homework questions per week. Now, he gives us around 20-30, which is a lot more manageable. Since MATH 105 was my first course, I thought that it was the appropriate amount of workload, but now that we are being given just 30 questions for MATH 201, I feel like MATH 105 could have had fewer HW questions. • The recitation can spend more time to solve students' problems in their class and homework. A survey to collect problems can be done every time after class. 	

8 - Please use a five-point scale (5="A great deal", 1="Nothing") to indicate how much you learned from this course in general.

Response Option	Weight	Frequency	Percent	Percent Responses	Means			
A great deal	(5)	9	60.00%					
A lot	(4)	6	40.00%					
A moderate amount	(3)	0	0.00%					
A little	(2)	0	0.00%					
None at all	(1)	0	0.00%					
				0 25 50 100	Question			
Response Rate				Mean		STD		Median
15/40 (37.50%)				4.60		0.51		5.00

Duke University - Duke Kunshan University

14 - This question is about Prof. Lin JiuAny other comments or suggestions for Prof. Lin Jiu? -

Response Rate	7/40 (17.5%)
<ul style="list-style-type: none"> • professor please dont use blue background with red/yellow highlight anymore! it is HARD to read during the lecture! • It would be better if students are allowed to raise questions during the exam, and the instructor has the right to not answer the questions while also hearing students' request, like checking typos in exam • Great • Great guy. • He is very nice and patient • The final exam accounts for a large proportion of the final grade, which adds heavy pressure on me. Maybe the proportion can be a little bit lower. • A checklist can be provided to clarify some important concepts to students.

15 - Which of the following best describes the instruction that you received for this course?

Response Option	Weight	Frequency	Percent	Percent Responses	Means			
Completely online	(1)	2	13.33%					
Primarily online	(2)	0	0.00%					
Roughly half online and half in person	(3)	0	0.00%					
Primarily in person	(4)	3	20.00%					
Completely in person	(5)	10	66.67%					
				0 25 50 100	Question			
Response Rate				Mean		STD		Median
15/40 (37.50%)				4.27		1.39		5.00

16 - About Hybrid and Online LearningPlease provide comments and/or suggestions about your online/hybrid learning experience.

Response Rate	1/40 (2.5%)
<p>• It's okay. I don't think DKU can do much more. However, to be honest, I am no longer watching recordings because it is very unengaging to watch recordings. Prof Lin Jiu came in clutch in terms of that. His notes are really really good. And his notes include everything that you need to know. No cryptic unknown questions during exams. So, I simply go over the notes before the weekly quizzes and that's how I learned MATH 201. It was very good. I did not need to watch any recordings. I understand that this might reflect badly on me as a "good student" should watch their lecture recordings. However, I think professors and students both know that no one really watches recordings like that (1.5 hours, 4 days, 7 weeks). Even from a psychological perspective, I found that my mental wellbeing was much much worse when I attended/watched lectures vs. when I didn't. This is because watching lectures constantly reminded me of the difference in opportunity and educational access between me and my Chinese classmates. It would fill me with sadness and anger that my Chinese classmates get to interact with my professor, engage fully with the lecture, ask questions during/after class without having their voice awkwardly blaring on the classroom speakers, and just generally being actual students and not some alien persons watching on Zoom. So, in a way, the psychological aspect played a large part in why I did not like to watch recordings. So, if I wanted to not watch recordings, in Prof Lin Jiu's classes, things are a lot easier because his notes are so good. I can go over his notes and then only watch portions of the recordings when I am unable to understand something that is written on the notes. I think this has been a very good system. I wish more professors had notes as encompassing and detailed as Prof Lin Jiu's. It would ease the pain of online school a lot.</p>
